

Mohawk Ltd.

A WBENC and ISO 9001:2008 Certified Company

"Vee" Nose Fiber Optic Splicing Trailer

Mohawk Ltd.'s "VEE" Nose Fiber Optic Splicing Trailer Offers Several Advantages:

- 15% more work and storage space
- Aerodynamic configuration greatly reduces wind resistance and increases fuel efficiency
- Added flexibility for interior work and storage configurations
- Available in 6'x10', 7'x12', 8'x12' and custom sizes

Other Advantages include:

- Fiberglass reinforced plywood (FRP) construction provides maximum durability, superior thermal and noise insulation, low maintenance, and extended life.
- Smooth interior and exterior walls are seamless and free of fasteners for ease of cleaning and maintenance.
- Structural aluminum or hot-dip galvanized steel frames and trim provide the ultimate in corrosion protection.
- Dexter "TorFlex" torsion axles offer superior suspension and handling characteristics.
- Specially designed gasoline fuel tanks are frame mounted and fully certified.
- Flush mount interior fluorescent lighting affords maximum head room.
- Generators from 5.5 kW to 7.0 kW (gasoline, fuel injection or propane) and ship-to-shore power with auto transfer switching provide flexible power options.
- All interior work surfaces and cabinetry are custom built, surfaced in plastic laminate for maximum durability and ease of maintenance.

Quality and Durability Backed by a 5-Year Warranty
